LEBLANC SOLUTIONS

Website Project & Testing Authorization

Every LeBlanc project starts with a security check of your current website, and any new website we build is tested before launch. This form gives us written permission to do that. We never test a website without it. Please complete every section, initial the testing type you approve, and sign at the end.

1. Client details

Business name _____

Contact name _____ **Phone** _____

Email _____ **Role** _____

2. Websites in scope

List your current website(s). Only these, plus the new website we build for you, may be tested. Anything else is out of scope.

#	Website / domain (e.g. example.com)	Notes (pages, staging site, exclusions)
1		
2		
3		

Not in scope unless listed above: other domains or subdomains, hosting provider infrastructure, payment processors, email systems, and any third-party service the site uses.

3. Type of testing approved

Tick and initial each type you approve. If only the first box is ticked, only recon testing will be done.

☐ **Recon testing (standard, part of every project)** — non-destructive checks of what any visitor can see: security headers, encryption, publicly visible software versions, exposed files, email/DNS records, and login behavior (a small number of failed sign-in attempts). Initials: _____

☐ **Active testing (optional)** — sends crafted test inputs to forms, search boxes and APIs to look for injection flaws. This may create test entries (e.g. contact-form submissions), trigger security alerts or appear in your logs. Initials: _____

4. Testing window

Start date _____ **End date** _____

☐ **Standard hours** — test after business hours: weekdays 6 pm to 7 am, and weekends.

Or allowed hours: _____

Time zone _____

5. How we test

- We test only the websites and testing types approved on this form, during the window above.

- If we build you a new website, we also test it before launch. That testing is covered by this form.
- We do not run denial-of-service attacks, attempt to take sites offline, or deliberately delete or change your data.
- We do not access, copy or keep customer or personal data beyond the minimum needed to show that a problem exists.
- We do not use phishing, phone calls or other social engineering against your staff.
- We stop testing immediately if you ask, by phone or email, for any reason.
- If we find a serious, actively exploitable problem, we tell your contact promptly instead of waiting for the report.

6. Confidentiality

Findings, reports and any information we learn about your systems are confidential. We share them only with the contacts on this form unless you instruct otherwise in writing. Raw scan data is deleted 90 days after the report is delivered unless you ask us to keep it for a re-check.

7. Your confirmations

By signing, you confirm that:

- You own the websites listed in section 2, or you are authorized by the owner to approve this testing.
- Where your hosting provider or platform requires notice or permission for security testing, you have given or obtained it.
- You have a current backup of your website and its data.
- You understand that although testing is designed to be safe, any testing carries some risk of slowing a site, triggering alerts or, with active testing, creating test entries.

8. Liability

LeBlanc Solutions will take reasonable care when testing. Our total liability arising from this engagement is limited to the fees you paid for it. You agree to cover any claims that result from incorrect information on this form, including about ownership of or permission for the listed websites.

9. Service and fee

Service _____ **Fee (USD)** _____

10. Signatures

This authorization covers only the websites, testing types and dates above, plus the new website we build for you. Any change must be agreed in writing.

CLIENT (website owner or authorized representative)

Signature _____ **Date** _____
